## **Absolute Environmental Completes Multi Million Dollar Interior Demolition, Asbestos Abatement & Re-Spray for Bank of America**

Absolute Environmental is happy to announce the completion of a multi-million dollar interior demolition, asbestos abatement and fireproofing re-spray at 99 Founders Plaza in East Hartford Connecticut.

The work was accomplished in 8 months and involved in excess of 60 laborers per day with occupied floors above and below the work zone encompassing 125,000 square feet. The contract value for the project was \$4.2 million dollars.

The interior demolition portion of the project involved demolition of 2- 50,000 square foot office floors with heavy build out. The asbestos component involved removal of asbestos containing fire proofing and flooring materials. Once all the asbestos fire proofing was removed the building had to be re-sprayed with non-asbestos containing fireproofing.

This project was very unique as this was one of Bank of America's centers for Global Operations and was considered a highly sensitive project.
